Initials: _____

Mook Sea Farm guarantees the viability of seed upon arrival. Pathology testing is done on a routine basis by Kennebec River Biosciences, Inc. of Richmond, Maine and the results are available on request or as required by receiving state agencies. Putative disease resistant broodstock are provided to us from a variety of sources (call us with any questions). We are not liable for losses of seed after receipt caused by any of the diseases tested for in the routine pathology tests. Any disputes must be adjudicated in Maine.
